

Heroes Pure

HEROES
PAINT

Finish: Matt

Colours: Full colour range via tintable base system

Coating type: Water borne acrylic emulsion, matt finish for interior use. Contains an active fungicide and formaldehyde scavenger.

Typical use: Durable, with good scrub and moisture resistance. Recommended for high use/wear areas such as hallways, kitchens and bathrooms. Low odour and good covering power (opacity). Can also be used as a primer on bare soft wood.

Coverage rate: Up to 14 sq metres per litre on previously painted walls.

Coats: 2-3 coats

Preparation: Substrate must be clean, dry and dust-free. Prime bare plaster with a coat of paint that has been thinned 20% with water (1 litre of water to 4 litres of paint), or use 'contract' emulsion which is designed to go onto bare plaster. Bare plaster must be properly dry before painting. Previously painted walls should be cleaned with sugar soap and lightly abraded. This is especially important if you are painting onto a 'shiny' surface such as Vinyl Silk or Eggshell. Any cracks or holes should be filled, sanded and then primed.

Application conditions: Substrate temperature must be at least 5°C and no more than 20°C.

Application method: Brush, roller, airless spray.

Application: Stir the paint thoroughly before application. Apply the first coat of Heroes Pure evenly across the prepared surface. Apply the paint at the recommended coverage rate. Avoid over applying the paint, as it may affect drying times and finish quality. 2 coats is normally sufficient. Strong colours may require a third coat. Avoid exposing the painted surface to water or heavy moisture for at least 12 hours after application to prevent discolouration or poor adhesion.

Drying time: Touch dry with in 30 minutes. Recoat time within 1-4 hours.

Shelf life: 12 months from date of manufacture in sealed container.

Storage: Store in a cool, dry place and protect from frost. Water borne paints that have been kept for more than 12 months can be subject to microbial attack that 'eats' the resin. Make sure that paint from an old tin is ok before using it again.
